My instructions with easy to follow patterns and directions are designed as a construction project for the beginner woodworker. Extensive attention is given to speed and ease of construction, with a minimum and choice of tools. A great Bookcase can be built with just a skill saw, hand saw with miter box, drill, tape measure, nail set and hammer. Directions are aimed at the beginner woodworker, but should not bore even an experienced carpenter.

**WARNING:** Everyone Will Love This Classic Bookcase Design. Just about everyone who sees it will want you to build one or more, for them. (That's the reason I decided to write these plans.) Unlike most plans out there, you will be able to understand these! I have looked at others and I guarantee they are not as good as my plans!

The plan features:

- 36 pages containing very detailed, step by step instructions.
- Each step includes diagrams and or photographs to assist in the construction process.
- 11 Patterns; One for each piece that makes construction so easy even those who have never worked with wood could make the project and make it look like a professional built it!
- Can be built entirely from any wood of your choice.
- Tips, Tricks and Notes that allow you to cut without error the first time.
- Can be built with just basic tools.
- This project plan is designed for the beginner woodworker, but should not bore even the most experienced carpenter.
