First Ecology: Ecological Principles and Environmental Issues

Alan Beeby, Anne-Marie Brennan

First Ecology: Ecological Principles and Environmental Issues Alan Beeby, Anne-Marie Brennan
First Ecology: Ecological Principles and Environmental Issues provides a critical and evaluative introduction to the science of ecology. Alan Beeby and Anne-Maria Brennan present a succinct survey of ecology, describing and explaining the relationship between living organisms and their environment.

In sequence, *First Ecology* develops the core themes of ecology at each level of organization - subcellular, population, ecosystem, landscape, and planetary. Understanding this hierarchy - and the interplay between these levels - is crucial to the environmental decisions our species faces at the start of the twenty-first century.

Distinctive Features

- Assumes little background knowledge and leads students gradually into the subject to build understanding, making it ideal for students from a range of disciplines.
- Detailed examples and case studies build on principles introduced in the text, thus allowing students to see ecological techniques in action.
- An **Online Resource Center** (password protected) offers instructors a virtual field course comprised of exercises using real data to assist and enrich students' time in the field; figures from the book, available to download to facilitate lecture preparation; PowerPoint slides introducing key concepts, supported with integrated figures from the book; and answers to exercises provided in the book. For students, the site provides hyperlinks to the primary literature cited in the book, and a web link library of all the URLs included in the book, together with additional web links on specific topics.
