Doing Math with Python: Use Programming to Explore Algebra, Statistics, Calculus, and More! Amit Saha

Doing Math with Python shows you how to use Python to delve into high school—level math topics like statistics, geometry, probability, and calculus. You'll start with simple projects, like a factoring program and a quadratic-equation solver, and then create more complex projects once you've gotten the hang of things.

Along the way, you'll discover new ways to explore math and gain valuable programming skills that you'll use throughout your study of math and computer science. Learn how to:

- Describe your data with statistics, and visualize it with line graphs, bar charts, and scatter plots
- Explore set theory and probability with programs for coin flips, dicing, and other games of chance
- Solve algebra problems using Python's symbolic math functions
- Draw geometric shapes and explore fractals like the Barnsley fern, the Sierpinski triangle, and the Mandelbrot set
- Write programs to find derivatives and integrate functions

Creative coding challenges and applied examples help you see how you can put your new math and coding skills into practice. You'll write an inequality solver, plot gravity's effect on how far a bullet will travel, shuffle a deck of cards, estimate the area of a circle by throwing 100,000 "darts" at a board, explore the relationship between the Fibonacci sequence and the golden ratio, and more.

Whether you're interested in math but have yet to dip into programming or you're a teacher looking to bring programming into the classroom, you'll find that Python makes programming easy and practical. Let Python handle the grunt work while you focus on the math.

From reader reviews:

Mary Wing:

What do you think of book? It is just for students because they're still students or it for all people in the world, what the best subject for that? Just simply you can be answered for that question above. Every person has different personality and hobby for each other. Don't to be obligated someone or something that they don't desire do that. You must know how great and also important the book Doing Math with Python: Use Programming to Explore Algebra, Statistics, Calculus, and More!. All type of book can you see on many solutions. You can look for the internet sources or other social media.

Cindy Knutson:

In this 21st century, people become competitive in every single way. By being competitive currently, people have do something to make these individuals survives, being in the middle of typically the crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated the idea for a while is reading. Yep, by reading a reserve your ability to survive enhance then having chance to stay than other is high. In your case who want to start reading any book, we give you that Doing Math with Python: Use Programming to Explore Algebra, Statistics, Calculus, and More! book as beginning and daily reading publication. Why, because this book is greater than just a book.

Charlotte Lee:

Your reading sixth sense will not betray you actually, why because this Doing Math with Python: Use Programming to Explore Algebra, Statistics, Calculus, and More! guide written by well-known writer who knows well how to make book that may be understand by anyone who read the book. Written with good manner for you, dripping every ideas and writing skill only for eliminate your current hunger then you still doubt Doing Math with Python: Use Programming to Explore Algebra, Statistics, Calculus, and More! as good book but not only by the cover but also by content. This is one reserve that can break don't assess book by its include, so do you still needing one more sixth sense to pick this!? Oh come on your looking at sixth sense already alerted you so why you have to listening to an additional sixth sense.

Johnny Sutton:

Reading a book to become new life style in this calendar year; every people loves to go through a book. When you read a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. In order to get information about your study, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this kind of us novel, comics, as well as soon. The Doing Math with Python: Use Programming to Explore Algebra, Statistics, Calculus, and More! will give you a new experience in reading a book.
