Mining and Energy Law Samantha Hepburn

Mining and Energy Law is the only textbook available that encompasses a discussion of both the law and the policy of mining and resource regulation in existing and emergent areas, for the Commonwealth as well as for the states and territories in Australia. The book begins by examining the ownership framework underpinning natural resources within Australia and reviews the proprietary status and scope of mining tenements, and the regulation of offshore petroleum extraction. It goes on to explore the legal regimes that have emerged in response to more recent developments, such as coal seam gas, renewable energy and geo-sequestration. The book concludes with a discussion of the commercial and contractual arrangements commonly used by transacting parties operating in the sector. Mining and Energy Law is the ideal starting point for anyone seeking to understand the regulatory regimes and policy challenges relevant to one of Australia's most important industry sectors.
