A First Course in Real Analysis (Undergraduate Texts in Mathematics)

Sterling K. Berberian

A First Course in Real Analysis (Undergraduate Texts in Mathematics) Sterling K. Berberian
Mathematics is the music of science, and real analysis is the Bach of mathematics. There are many other foolish things I could say about the subject of this book, but the foregoing will give the reader an idea of where my heart lies. The present book was written to support a first course in real analysis, normally taken after a year of elementary calculus. Real analysis is, roughly speaking, the modern setting for Calculus, "real" alluding to the field of real numbers that underlies it all. At center stage are functions, defined and taking values in sets of real numbers or in sets (the plane, 3-space, etc.) readily derived from the real numbers; a first course in real analysis traditionally places the emphasis on real-valued functions defined on sets of real numbers. The agenda for the course: (1) start with the axioms for the field of real numbers, (2) build, in one semester and with appropriate rigor, the foundations of calculus (including the "Fundamental Theorem"), and, along the way, (3) develop those skills and attitudes that enable us to continue learning mathematics on our own. Three decades of experience with the exercise have not diminished my astonishment that it can be done.

From reader reviews:

Alice Christensen:

Information is provisions for people to get better life, information presently can get by anyone at everywhere. The information can be a understanding or any news even restricted. What people must be consider when those information which is inside the former life are challenging to be find than now is taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you receive the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All those possibilities will not happen in you if you take A First Course in Real Analysis (Undergraduate Texts in Mathematics) as the daily resource information.

Nancy Figaro:

Reading a e-book can be one of a lot of task that everyone in the world likes. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new data. When you read a e-book you will get new information due to the fact book is one of a number of ways to share the information or maybe their idea. Second, looking at a book will make you actually more imaginative. When you examining a book especially fiction book the author will bring that you imagine the story how the figures do it anything. Third, you can share your knowledge to some others. When you read this A First Course in Real Analysis (Undergraduate Texts in Mathematics), you could tells your family, friends as well as soon about yours guide. Your knowledge can inspire the others, make them reading a book.

Minnie Weiner:

People live in this new day time of lifestyle always make an effort to and must have the time or they will get large amount of stress from both day to day life and work. So , whenever we ask do people have extra time, we will say absolutely sure. People is human not only a robot. Then we inquire again, what kind of activity do you possess when the spare time coming to you of course your answer will probably unlimited right. Then do you ever try this one, reading books. It can be your alternative with spending your spare time, the actual book you have read is actually A First Course in Real Analysis (Undergraduate Texts in Mathematics).

Cassandra Harvey:

Don't be worry for anyone who is afraid that this book will probably filled the space in your house, you will get it in e-book technique, more simple and reachable. This specific A First Course in Real Analysis (Undergraduate Texts in Mathematics) can give you a lot of friends because by you looking at this one book you have factor that they don't and make you actually more like an interesting person. This kind of book can be one of one step for you to get success. This publication offer you information that perhaps your friend doesn't understand, by knowing more than other make you to be great individuals. So , why hesitate? Let me have A First Course in Real Analysis (Undergraduate Texts in Mathematics).
