## Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series)

Zhiang (John) Lin, Kathleen M. Carley

**Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications** (Information and Organization Design Series) Zhiang (John) Lin, Kathleen M. Carley **Designing Stress Resistant Organizations** demonstrates, in a persuasive way, how computational organization theory can be applied to advance the field of management with its successful integration of theory and practice.

At the theoretical level, the book contains a comprehensive computational framework called DYCORP, which simulates dynamic and interactive organizational behaviors by incorporating multiple factors such as organizational design, task environment, and stress, and which generates consistent and insightful propositions on organizational performance.

The book utilizes an organization science based approach to computational modeling. This approach recognizes the limit of human cognition as it was outlined by Herbert A. Simon in 1947. The model strives to focus on the essence of the reality that is most relevant to the research issue. This approach has been proven to be more beneficial for us to understand the underlying dynamics of the phenomenon.

#### From reader reviews:

#### **Allison Price:**

This Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) tend to be reliable for you who want to be considered a successful person, why. The reason of this Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) can be one of many great books you must have is definitely giving you more than just simple examining food but feed a person with information that probably will shock your prior knowledge. This book will be handy, you can bring it everywhere you go and whenever your conditions both in e-book and printed people. Beside that this Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) forcing you to have an enormous of experience for instance rich vocabulary, giving you trial of critical thinking that we realize it useful in your day action. So , let's have it and enjoy reading.

#### **Michelle Dewees:**

Hey guys, do you would like to finds a new book to read? May be the book with the headline Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) suitable to you? Often the book was written by well-known writer in this era. Often the book untitled Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) is the main of several books in which everyone read now. This kind of book was inspired a number of people in the world. When you read this book you will enter the new dimensions that you ever know before. The author explained their plan in the simple way, and so all of people can easily to know the core of this e-book. This book will give you a wide range of information about this world now. To help you to see the represented of the world with this book.

#### Jennifer Pittman:

Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) can be one of your beginning books that are good idea. We all recommend that straight away because this guide has good vocabulary that may increase your knowledge in words, easy to understand, bit entertaining but nonetheless delivering the information. The copy writer giving his/her effort that will put every word into enjoyment arrangement in writing Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) nevertheless doesn't forget the main position, giving the reader the hottest and also based confirm resource facts that maybe you can be certainly one of it. This great information could drawn you into completely new stage of crucial thinking.

#### Patsy Kuster:

As we know that book is important thing to add our understanding for everything. By a guide we can know everything we really wish for. A book is a pair of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This book Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) was filled regarding science. Spend your free time to add your knowledge about your research competence. Some people has various feel when they reading the book. If you know how big benefit of a book, you can feel enjoy to read a e-book. In the modern era like currently, many ways to get book that you simply wanted.
