Tropical Foliage Plants: A Grower's Guide Lynn P. Griffith Jr.

Previously illustrated with black and white photographs, this reference now provides professionals with a colorful guide to the production of commercial foliage crops. Featuring updated and expanded information, including cultural changes, new technological advances, and eight new foliage crops, the guide now covers more than 70 species of foliage appropriate to commercial environments—anthuriums, bromeliads, ferns, bamboos, birds-of-paradise, and African violets. In addition to exploring each plant's natural habitat, varieties, and propagation, this reference also counsels growers on uses, nutrition, pests, disorders, interior care, and the most common problems affecting these types of foliage. Tables also list leaf analysis rating standards for nutrients for many of the crops discussed.
