From Complexity to Creativity: Explorations in Evolutionary, Autopoietic, and Cognitive Dynamics (IFSR International Series on Systems Science and Engineering) Ben Goertzel

Cybernetic pioneer Warren McCullough asked: "What is a man, that he may know a number; and what is a number, that a man may know it?" Thinking along much the same lines, my question here is: "What is a creative mind, that it might emerge from a complex system; and what is a complex system, that it might give rise to a creative mind?" Complexity science is a fashionable topic these days. My perspective on complexity, however, is a somewhat unusual one: I am interested in complex systems science principally as it reflects on abstract mathematical, computational models of mind. In my three previous books, *The Structure of Intelligence*, *Evolving Mind*, and *Chaotic Logic*, I have outlined a comprehensive complex-systems-theoretic theory of mind that I now call the psynet model. This book is a continuation of the research program presented in my previous books (and those books will be frequently referred to here, by the nicknames EM and CL). One might summarize the trajectory of thought spanning these four books as follows. SI formulated a philosophy and mathematics of mind, based on theoretical computer science and the concept of "pattern." EM analyzed the theory of evolution by natural selection in similar terms, and used this computational theory of evolution to establish the evolutionary nature of thought.

From reader reviews:

Mary Ybarra:

Book is usually written, printed, or highlighted for everything. You can understand everything you want by a guide. Book has a different type. To be sure that book is important thing to bring us around the world. Alongside that you can your reading talent was fluently. A e-book From Complexity to Creativity: Explorations in Evolutionary, Autopoietic, and Cognitive Dynamics (IFSR International Series on Systems Science and Engineering) will make you to always be smarter. You can feel considerably more confidence if you can know about everything. But some of you think in which open or reading a new book make you bored. It is far from make you fun. Why they can be thought like that? Have you trying to find best book or acceptable book with you?

Jessica Garcia:

This From Complexity to Creativity: Explorations in Evolutionary, Autopoietic, and Cognitive Dynamics (IFSR International Series on Systems Science and Engineering) book is simply not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is actually information inside this e-book incredible fresh, you will get data which is getting deeper an individual read a lot of information you will get. This kind of From Complexity to Creativity: Explorations in Evolutionary, Autopoietic, and Cognitive Dynamics (IFSR International Series on Systems Science and Engineering) without we understand teach the one who examining it become critical in considering and analyzing. Don't be worry From Complexity to Creativity: Explorations in Evolutionary, Autopoietic, and Cognitive Dynamics (IFSR International Series on Systems Science and Engineering) can bring if you are and not make your carrier space or bookshelves' turn out to be full because you can have it in the lovely laptop even cell phone. This From Complexity to Creativity: Explorations in Evolutionary, Autopoietic, and Cognitive Dynamics (IFSR International Series on Systems Science and Engineering) having great arrangement in word as well as layout, so you will not sense uninterested in reading.

David Black:

Your reading 6th sense will not betray anyone, why because this From Complexity to Creativity: Explorations in Evolutionary, Autopoietic, and Cognitive Dynamics (IFSR International Series on Systems Science and Engineering) reserve written by well-known writer whose to say well how to make book that could be understand by anyone who have read the book. Written in good manner for you, leaking every ideas and creating skill only for eliminate your hunger then you still uncertainty From Complexity to Creativity: Explorations in Evolutionary, Autopoietic, and Cognitive Dynamics (IFSR International Series on Systems Science and Engineering) as good book not just by the cover but also by the content. This is one guide that can break don't ascertain book by its include, so do you still needing an additional sixth sense to pick this particular!? Oh come on your studying sixth sense already said so why you have to listening to an additional sixth sense.

Mark Garcia:

Reading a book to get new life style in this season; every people loves to study a book. When you read a book you can get a wide range of benefit. When you read books, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your study, you can read education books, but if you want to entertain yourself read a fiction books, these kinds of us novel, comics, and also soon. The From Complexity to Creativity: Explorations in Evolutionary, Autopoietic, and Cognitive Dynamics (IFSR International Series on Systems Science and Engineering) provide you with new experience in looking at a book.
