## **A First Course in Network Theory** Ernesto Estrada, Philip Knight

The study of network theory is a highly interdisciplinary field, which has emerged as a major topic of interest in various disciplines ranging from physics and mathematics, to biology and sociology. This book promotes the diverse nature of the study of complex networks by balancing the needs of students from very different backgrounds. It references the most commonly used concepts in network theory, provides examples of their applications in solving practical problems, and clear indications on how to analyse their results.

In the first part of the book, students and researchers will discover the quantitative and analytical tools necessary to work with complex networks, including the most basic concepts in network and graph theory, linear and matrix algebra, as well as the physical concepts most frequently used for studying networks. They will also find instruction on some key skills such as how to proof analytic results and how to manipulate empirical network data. The bulk of the text is focused on instructing readers on the most useful tools for modern practitioners of network theory. These include degree distributions, random networks, network fragments, centrality measures, clusters and communities, communicability, and local and global properties of networks. The combination of theory, example and method that are presented in this text, should ready the student to conduct their own analysis of networks with confidence and allow teachers to select appropriate examples and problems to teach this subject in the classroom.

### **From reader reviews:**

#### **John Drew:**

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each e-book has different aim as well as goal; it means that publication has different type. Some people feel enjoy to spend their time and energy to read a book. These are reading whatever they have because their hobby is definitely reading a book. Consider the person who don't like studying a book? Sometime, individual feel need book once they found difficult problem or perhaps exercise. Well, probably you will want this A First Course in Network Theory.

#### **Shelly Gomes:**

The book A First Course in Network Theory can give more knowledge and also the precise product information about everything you want. Why then must we leave the best thing like a book A First Course in Network Theory? Some of you have a different opinion about e-book. But one aim in which book can give many data for us. It is absolutely appropriate. Right now, try to closer using your book. Knowledge or info that you take for that, you are able to give for each other; you may share all of these. Book A First Course in Network Theory has simple shape but the truth is know: it has great and large function for you. You can appearance the enormous world by open and read a reserve. So it is very wonderful.

#### **Thomas Carroll:**

Book is to be different for every single grade. Book for children right up until adult are different content. As you may know that book is very important for all of us. The book A First Course in Network Theory had been making you to know about other expertise and of course you can take more information. It is quite advantages for you. The guide A First Course in Network Theory is not only giving you much more new information but also to be your friend when you feel bored. You can spend your own personal spend time to read your guide. Try to make relationship while using book A First Course in Network Theory. You never feel lose out for everything if you read some books.

#### **Annamarie Hernandez:**

Do you have something that you prefer such as book? The book lovers usually prefer to select book like comic, limited story and the biggest the first is novel. Now, why not trying A First Course in Network Theory that give your pleasure preference will be satisfied through reading this book. Reading routine all over the world can be said as the means for people to know world a great deal better then how they react to the world. It can't be said constantly that reading behavior only for the geeky man but for all of you who wants to always be success person. So , for every you who want to start reading through as your good habit, you may pick A First Course in Network Theory become your personal starter.
