Design in Nature: Learning from Trees Claus Mattheck
The chicken bone you nibbled yesterday and threw away was a high-tech product! Not only that: it was a superlative light-weight design, functionally adapted to its mechanical requirements. No engineer in the world has, as yet, been able to copy this structural member, which is excellently optimized in its external shape and its internal architecture as regards minimum weight and maximum strength. The tree stem on which you recently carved your initials has also, by life-long care for its body, steadily improved its internal and external structure and adapted optimally to new loads. In the course of its biomechanical self-optimization it will heal up the notch you cut as speedily as possible, in order to repair even the smallest weak point, which might otherwise cost it its life in the next storm. This book is dedicated to the understanding of this biomechanical optimization of shape. It is the synthesis of many years of extensive research using the latest computer methods at the Karlsruhe Research Centre to help understand the mechanism of biological self-optimization (adaptive growth) and to simulate it by computer. The method newly developed for this purpose was called CAO (Computer-Aided Optimization). With this method, it is possible to predict the growth of trees, bones and other biological structures from the tiger's claw to the sea urchin's skeleton.

From reader reviews:

Alice Bowers:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each publication has different aim or perhaps goal; it means that book has different type. Some people really feel enjoy to spend their time and energy to read a book. These are reading whatever they acquire because their hobby will be reading a book. Why not the person who don't like examining a book? Sometime, person feel need book if they found difficult problem or perhaps exercise. Well, probably you will need this Design in Nature: Learning from Trees.

Elaine Gold:

The book Design in Nature: Learning from Trees can give more knowledge and information about everything you want. Why then must we leave a very important thing like a book Design in Nature: Learning from Trees? Several of you have a different opinion about guide. But one aim this book can give many details for us. It is absolutely right. Right now, try to closer along with your book. Knowledge or facts that you take for that, you may give for each other; you could share all of these. Book Design in Nature: Learning from Trees has simple shape nevertheless, you know: it has great and massive function for you. You can seem the enormous world by wide open and read a book. So it is very wonderful.

Wayne Gaddis:

As people who live in the actual modest era should be update about what going on or facts even knowledge to make these people keep up with the era which is always change and move ahead. Some of you maybe can update themselves by examining books. It is a good choice for yourself but the problems coming to you is you don't know which you should start with. This Design in Nature: Learning from Trees is our recommendation to help you keep up with the world. Why, since this book serves what you want and wish in this era.

Elizabeth Villalobos:

Do you one among people who can't read enjoyable if the sentence chained inside straightway, hold on guys this particular aren't like that. This Design in Nature: Learning from Trees book is readable by simply you who hate those perfect word style. You will find the information here are arrange for enjoyable studying experience without leaving possibly decrease the knowledge that want to provide to you. The writer regarding Design in Nature: Learning from Trees content conveys thinking easily to understand by many people. The printed and e-book are not different in the articles but it just different by means of it. So , do you continue to thinking Design in Nature: Learning from Trees is not loveable to be your top checklist reading book?
