Stress Corrosion Cracking: Theory and Practice (Woodhead Publishing Series in Metals and Surface Engineering)

The problem of stress corrosion cracking (SCC), which causes sudden failure of metals and other materials subjected to stress in corrosive environment(s), has a significant impact on a number of sectors including the oil and gas industries and nuclear power production. Stress corrosion cracking reviews the fundamentals of the phenomenon as well as examining stress corrosion behaviour in specific materials and particular industries.

The book is divided into four parts. Part one covers the mechanisms of SCC and hydrogen embrittlement, while the focus of part two is on methods of testing for SCC in metals. Chapters in part three each review the phenomenon with reference to a specific material, with a variety of metals, alloys and composites discussed, including steels, titanium alloys and polymer composites. In part four, the effect of SCC in various industries is examined, with chapters covering subjects such as aerospace engineering, nuclear reactors, utilities and pipelines.

With its distinguished editors and international team of contributors, Stress corrosion cracking is an essential reference for engineers and designers working with metals, alloys and polymers, and will be an invaluable tool for any industries in which metallic components are exposed to tension, corrosive environments at ambient and high temperatures.

- Examines the mechanisms of stress corrosion cracking (SCC) presenting recognising testing methods and materials resistant to SCC
- Assesses the effect of SCC on particular metals featuring steel, stainless steel, nickel-based alloys, magnesium alloys, copper-based alloys and welds in steels
- Reviews the monitoring and management of SCC and the affect of SCC in different industries such as petrochemical and aerospace

From reader reviews:

Minerva Gagliano:

What do you concerning book? It is not important along with you? Or just adding material if you want something to explain what you problem? How about your free time? Or are you busy man or woman? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Every person has many questions above. They need to answer that question since just their can do this. It said that about reserve. Book is familiar in each person. Yes, it is appropriate. Because start from on guardería until university need that Stress Corrosion Cracking: Theory and Practice (Woodhead Publishing Series in Metals and Surface Engineering) to read.

Brenda Wright:

Can you one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Make an effort to pick one book that you find out the inside because don't judge book by its include may doesn't work here is difficult job because you are afraid that the inside maybe not seeing that fantastic as in the outside appear likes. Maybe you answer may be Stress Corrosion Cracking: Theory and Practice (Woodhead Publishing Series in Metals and Surface Engineering) why because the wonderful cover that make you consider in regards to the content will not disappoint an individual. The inside or content is fantastic as the outside or even cover. Your reading sixth sense will directly assist you to pick up this book.

Christopher Thompson:

That publication can make you to feel relax. This particular book Stress Corrosion Cracking: Theory and Practice (Woodhead Publishing Series in Metals and Surface Engineering) was colourful and of course has pictures on there. As we know that book Stress Corrosion Cracking: Theory and Practice (Woodhead Publishing Series in Metals and Surface Engineering) has many kinds or variety. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and think that you are the character on there. Therefore , not at all of book usually are make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading in which.

Deanna Jackson:

A lot of publication has printed but it differs from the others. You can get it by internet on social media. You can choose the best book for you, science, comedy, novel, or whatever through searching from it. It is called of book Stress Corrosion Cracking: Theory and Practice (Woodhead Publishing Series in Metals and Surface Engineering). You can include your knowledge by it. Without departing the printed book, it can add your knowledge and make anyone happier to read. It is most crucial that, you must aware about reserve. It can bring you from one place to other place.
