Asesh Roy Chowdhury, Aninlya Ghose Choudhury

Quantum Integrable Systems (Chapman & Hall/CRC Research Notes in Mathematics Series) Asesh Roy Chowdhury, Aninlya Ghose Choudhury

The study of integrable systems has opened new horizons in classical physics over the past few decades, particularly in the subatomic world. Yet despite the field now having reached a level of maturity, very few books provide an introduction to the field accessible to specialists and nonspecialists alike, and none offer a systematic survey of the more recent advances.

This book presents and clarifies the developments of the last ten years in quantum integrable systems. After a preliminary discussion of the fundamentals of classical nonlinear integrable systems, the authors explore the quantum domain. Their approach emphasizes physical systems and the use of concrete examples, and they take care to establish the relationship between new and older methods. The presentation includes the first comprehensive discussion of the quantum Bäcklund transformation Q-operator and various techniques related to algebraic Bethe Ansatz that are not available elsewhere in book form.

In Quantum Integrable Systems, researchers active in the field have an up-to-date source for recent advances and new techniques, and nonspecialists finally have an accessible introduction to the concepts and basic tools they need to explore and exploit the wide-ranging applicability of the subject.

From reader reviews:

Roberto Reyes:

As people who live in often the modest era should be change about what going on or info even knowledge to make these keep up with the era and that is always change and move ahead. Some of you maybe will update themselves by studying books. It is a good choice for yourself but the problems coming to you is you don't know what kind you should start with. This Quantum Integrable Systems (Chapman & Hall/CRC Research Notes in Mathematics Series) is our recommendation so you keep up with the world. Why, because book serves what you want and wish in this era.

Daniel Moore:

Hey guys, do you would like to finds a new book you just read? May be the book with the headline Quantum Integrable Systems (Chapman & Hall/CRC Research Notes in Mathematics Series) suitable to you? Often the book was written by well known writer in this era. The particular book untitled Quantum Integrable Systems (Chapman & Hall/CRC Research Notes in Mathematics Series)is the one of several books that will everyone read now. That book was inspired many people in the world. When you read this e-book you will enter the new age that you ever know previous to. The author explained their thought in the simple way, consequently all of people can easily to comprehend the core of this reserve. This book will give you a wide range of information about this world now. To help you see the represented of the world in this book.

Richard Burnett:

You can find this Quantum Integrable Systems (Chapman & Hall/CRC Research Notes in Mathematics Series) by look at the bookstore or Mall. Just viewing or reviewing it could to be your solve problem if you get difficulties for the knowledge. Kinds of this book are various. Not only by simply written or printed but also can you enjoy this book by simply e-book. In the modern era just like now, you just looking by your local mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose suitable ways for you.

Patricia Stroud:

What is your hobby? Have you heard this question when you got students? We believe that that issue was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person like reading or as reading through become their hobby. You need to know that reading is very important and book as to be the thing. Book is important thing to increase you knowledge, except your current teacher or lecturer. You will find good news or update in relation to something by book. Different categories of books that can you decide to try be your object. One of them is Quantum Integrable Systems (Chapman & Hall/CRC Research Notes in Mathematics Series).
