M Abranowitz

Handbook of Mathematical Functions with Formulas, Graphs, and Mathematical Tables, National Bureau of Standards, Applied Mathematics Series M Abranowitz

The present Handbook has been designed to provide scientific investigators with a comprehensive and self-contained summary of the mathematical functions that arise in physical and engineering problems. The well-known Tables of Functions by E. Jahnke and F. Emde has been invaluable to workers in these fields in its many editions during the past half-century. The present volume extends the work of these authors by giving more extensive and more accurate numerical tables, and by giving larger collections of mathematical properties of the tabulated functions. The number of functions covered has also been increased.

The classification of functions and organization of the chapters in the Handbook is similar to that of An Index of Mathematical Tables by A. Fletcher, J.C.P. Miller and L. Rosenhead. In general, the chapters contain numerical tables, graphs and polynomial or rational approximations for automatic computers, and statements of the principal mathematical properties of the tabulated functions, particularly those of computational importance.

Many numerical examples are given to illustrate the use of the table and also the computation of function values which lie outside their range. At the end of the text in each chapter there is a short bibliography giving books and papers in which proofs of the mathematical properties stated in the chapter may be found. Also listed in the bibliographies are the more important numerical tables.

From reader reviews:

Barbara Marburger:

In this 21st hundred years, people become competitive in most way. By being competitive at this point, people have do something to make all of them survives, being in the middle of the particular crowded place and notice by surrounding. One thing that often many people have underestimated the idea for a while is reading. Sure, by reading a book your ability to survive boost then having chance to stand than other is high. For you who want to start reading the book, we give you this Handbook of Mathematical Functions with Formulas, Graphs, and Mathematical Tables, National Bureau of Standards, Applied Mathematics Series book as beginning and daily reading publication. Why, because this book is greater than just a book.

Andrew Fox:

Spent a free time for you to be fun activity to try and do! A lot of people spent their free time with their family, or their particular friends. Usually they doing activity like watching television, likely to beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? Can be reading a book is usually option to fill your cost-free time/ holiday. The first thing that you'll ask may be what kinds of e-book that you should read. If you want to try out look for book, may be the reserve untitled Handbook of Mathematical Functions with Formulas, Graphs, and Mathematical Tables, National Bureau of Standards, Applied Mathematics Series can be very good book to read. May be it is usually best activity to you.

Todd James:

The book untitled Handbook of Mathematical Functions with Formulas, Graphs, and Mathematical Tables, National Bureau of Standards, Applied Mathematics Series contain a lot of information on it. The writer explains your ex idea with easy method. The language is very easy to understand all the people, so do not worry, you can easy to read the item. The book was published by famous author. The author provides you in the new age of literary works. It is possible to read this book because you can continue reading your smart phone, or gadget, so you can read the book in anywhere and anytime. If you want to buy the e-book, you can open up their official web-site and order it. Have a nice study.

Margaret Walker:

Reading a book make you to get more knowledge from it. You can take knowledge and information from a book. Book is composed or printed or outlined from each source which filled update of news. In this modern era like right now, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science book, encyclopedia, reference book, book and comic. You can add your understanding by that book. Are you hip to spend your spare time to spread out your book? Or just searching for the Handbook of Mathematical Functions with Formulas, Graphs, and Mathematical Tables, National Bureau of Standards, Applied Mathematics Series when you essential it?
