## **Quantum Physics, Near Death Experiences, Eternal Consciousness, Religion, and the Human Soul**

William Joseph Bray

From the Late Prof. W J Bray The purpose is to look at the evidence in Quantum Theory and Physical Cosmology, the century old question regarding the role of consciousness in reality. In that century old debate, no one has yet to define ‘consciousness.’ This text examines the compelling evidence in Quantum Theory and Physical Cosmology, in order to render a formal definition for ‘consciousness’ that is suitable within the frameworks of Quantum Theory, but also the religions of man, philosophy, and human perception. Oddly, the phenomenon known as the clinical Near Death Experience seems to provide a scaffold for this definition for ‘consciousness.’ This definition for ‘consciousness’ requires infinite scope; rendering ‘reality’ to an infinitesimal, non-existent. We then look at the finite nature of our cosmos and conclude, if the evidence is compelling enough, that we are infinite beings merely perceiving a finite system. Written by a Physicist whose expertise spans a wide range of fields, from Neuroscience Research to philosophy and religion, and who has also experienced multiple medically documented NDEs, the book suggests mathematically that reality, the Universe as we perceive it, can only exist interdependent with consciousness. Reviewing Quantum Physics from its founders’ definitions up to the latest research in the field, Bray explains in detail in language every layman can understand, provided commitment to do further research available on the WWW. The text then goes on to describe how we interact with, manipulate and define the Universe, ultimately how we “paint the universe into being”, to use Bray’s own syntagm. He substantiates his theory with logical arguments and hard data that have been proven correct throughout a century of quantum research. After disproving beyond any reasonable doubt that consciousness is an artifact of the physical brain, by using experimental data and conclusions independently verified by leading researchers worldwide, Bray describes how consciousness creates the physical universe, how it is mathematically impossible that consciousness can be finite, and that the universe is. His conclusion that consciousness is unique for each individual is a natural outcome of his scientific, physics-based argumentation, as is the evidence that consciousness must be infinite and eternal in order to exist. We perceive this short, finite, physical life, while at the same time existing as eternal consciousness, unaware of it, because we are focusing on this finite Universe as a mere perception. Bray’s purpose is not to “prove” God, but to show that each of us is a unique individual consciousness that exists beyond space-time, for infinity. He goes even further to identify the truths that have been enduring and immutable throughout centuries in philosophy and religion, by distilling them from myth and dogma. In addition, by doing this, he dismisses many paradoxes in physics, religions and philosophy. Bray succeeds in convincingly intersecting science and spirituality and showing that, contrary to cognitive beliefs which are prone to constant change, Faith is an immutable spiritual state. He has studied it not only as a scientist, but has also experienced NDEs first-hand, through recurrent cardiac arrests due to a severe medical condition that brought him repeatedly to the brink of death. Thus, the NDEs are described from the perspective of a rigorous scientist who refrains from including any biased description of them. His arguments are unambiguous, devoid of metaphor or uncertainty and the book is by no means an ideological argument or exploration, although it is at odds with almost everything written to date; Bray’s claims are substantiated with solid mathematical axioms. ‘Quantum Temporal Dynamics,’ (not related to other material using that name) is included at the end of the book, re-exploring quantum theory from scratch, and detailing mechanisms for faster- than- light travel using current technology
