Washington Irving's The Legend of Sleepy Hollow is one of the few early American short stories that is still widely read today.

Most people are probably familiar with the story through the movie and television renditions of the story. The earliest of which was in 1922, a version called The Headless Horseman starring Will Rogers as the main character, Ichabod Crane.

So, Irving's legend takes place around 1790 (which isn't long after the Revolutionary war) in Tarry Town, New York in the small village of Sleepy Hollow, which is a Dutch settlement. The story begins with an extremely flamboyant description of the countryside and Ichabod himself. It's here we learn that Ichabod is new to the area, a bit superstitious and actively pursuing Katrina. We also learn that he's not the only one; Brom Bones is also after her hand and is doing his best pranks to keep Ichabod away.

The story comes to its climax after a party at the Van Tassel's where Ichabod gets his panties all in a wad listening to a bunch of different ghost stories - including that of the headless horseman. On his way home that night, he is followed by a stranger. Irving describes the scene by saying, 'but his horror was still more increased, on observing that the head which should have rested on his shoulders, was carried before him on the pommel of his saddle.'
