## A Social History of England, 900-1200

The years between 900 and 1200 saw transformative social change in Europe, including the creation of extensive town-dwelling populations and the proliferation of feudalised elites and bureaucratic monarchies. In England these developments were complicated and accelerated by repeated episodes of invasion, migration and changes of regime. In this book, scholars from disciplines including history, archaeology and literature reflect on the major trends which shaped English society in these years of transition and select key themes which encapsulate the period. The authors explore the landscape of England, its mineral wealth, its towns and rural life, the health, behaviour and obligations of its inhabitants, patterns of spiritual and intellectual life and the polyglot nature of its population and culture. What emerges is an insight into the complexity, diversity and richness of this formative period of English history.
